(54) Title: COMPUTER TOMOGRAPH WITH OPTOELECTRONIC DATA TRANSFER

(57) Abstract: The invention relates to a computer tomograph, in which data from a rotor, which during operation of the computer tomograph rotates about an axis of rotation, is transferred optoelectronically. For that purpose, on the rotor there is located at least one transmitter, which transmits light towards a receiver mounted on the axis of rotation, the light being modulated with the data to be transferred.
